SKILLS

Ruby	JavaScript (ES6)	React	HTML5	SQL	Python
Ruby on Rails	jQuery	Redux	CSS3	Git	pandas

PROJECTS

Jumpstarter - Full-stack single-page web app inspired by Kickstarter

Technologies Used: (Ruby, Rails, jBuilder) (React, Redux, jQuery)

[Live](#) / [Github](#)

- Created threaded ActiveRecord associations to fetch database data without N+1 queries
- Implemented front-end JavaScript validations on form elements to reduce server requests
- Designed dynamic forms that utilize React Router to render different React components

Sokoban - Browser block-pushing puzzle game built with ES6 and Easel.js

Technologies Used: JavaScript (ES6), Easel.js, HTML5 Canvas, jQuery

[Live](#) / [Github](#)

- Utilized arrow keys to move player around 2D grid that permits and prohibits motion
- Rendered new round dynamically upon player victory or by interaction with three buttons
- Added 30 game levels, each of which instantiates a custom instance of main game class

Catalyst - JavaScript utility library for common operations with arrays, objects, and more!

Technologies Used: JavaScript (ES6)

[Live](#) / [Github](#)

- Implemented 40+ methods for interacting with and manipulating JavaScript data types
- Added built-in documentation system with descriptions and use cases for each function

WORK EXPERIENCE

Indeed / SEPT 2015 - FEB 2017

- Create 10+ JavaScript programs (event registration form, learning management system, employee feedback survey) within the Google apps ecosystem (Gmail, Sheets, Forms)

EDUCATION

App Academy - New York, NY

2017

Intensive full-stack web development bootcamp with 3% acceptance rate. Curriculum includes Rails, JavaScript, SQL, and React / Redux.

New York University, Stern School of Business

2009 - 2013

Bachelor of Science (B.S) in Business Economics and Marketing
